

prodotto **SADEV**

inox-slide

porte scorrevoli - puertas correderas
sliding doors - Schiebetüren

Minusco propone un sistema scorrevole prodotto da SADEV e completamente realizzato in acciaio inox AISI 304. Quest'ultima caratteristica lo rende decisamente interessante sia tecnicamente che esteticamente, oltre all' ottimo rapporto qualità prezzo. Lo scorrevole inox è adatto ad una vasta gamma di contesti architettonici sia moderni e minimali che in ristrutturazioni di edifici storici. Può essere fissato a muro oppure direttamente sul vetro ed è previsto ad anta singola oppure doppia anta. La semplicità d'installazione e regolazione (viene venduto in semplici kit completi), lo rendono particolarmente amato dai numerosi installatori in Italia e nel Mondo.

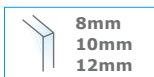

Los nuevos sistemas de puertas correderas que Minusco ofrece, son las de Sadev. Estan producidos en acero AISI 304. Esta peculiaridad pone los nuevos sistemas muy interesantes por sus técnica, sus estética, sus precios y calidad. Estos sistemas de correderas en acero, se ponen interesantes en un contexto arquitectónico moderno y en remodelación. Pueden ser fijados a la pared o a vidrio; se prevehe uso con hoja simple o doble. El ajuste es simple. Se vende en kit y – por esto – le gusta a los instaladores en Italia y en el mundo.

Minusco proposes a sliding system produced by SADEV and realized completely in stainless steel AISI 304. This latter characteristic makes it certainly interesting both technically and aesthetically. It also has an excellent prices-quality ratio. The sliding stainless steel is suitable for a wide range of architectural contexts, both on minima list and also for historic building restructuring. It may be fixed directly on the wall or on the glass and it has been designed with single or double glaze. Thanks to an easy installation and adjustment (sold in simple complete sets) it is particularly appreciated by many installers in Italy and in the world.

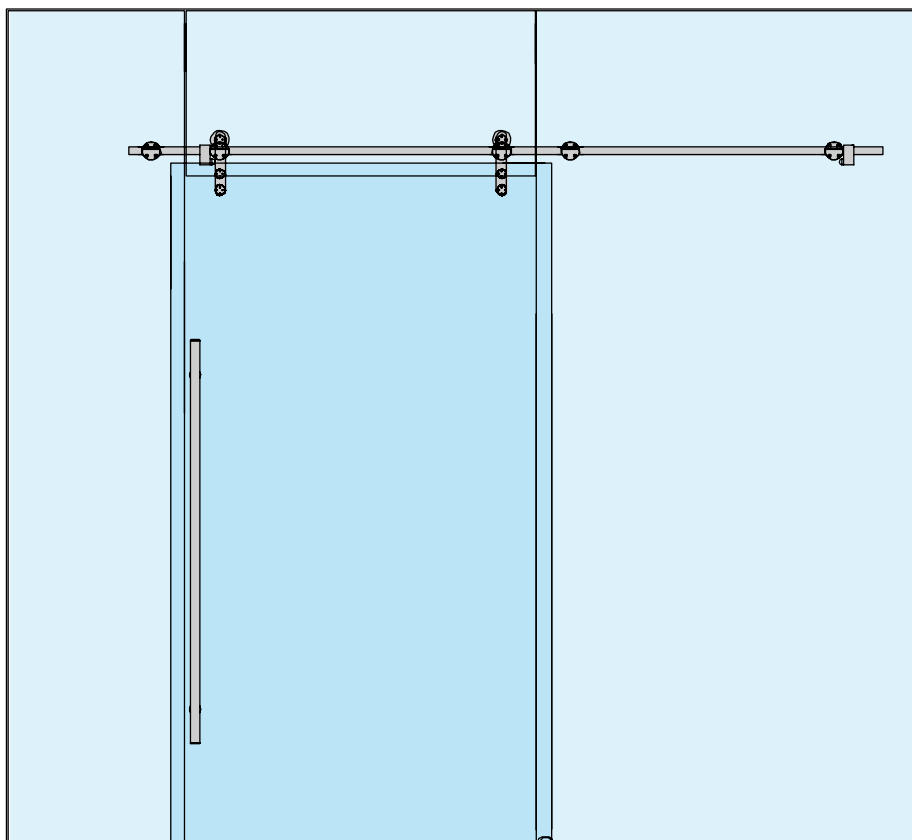

Minusco führt ein Schiebesystem ein, der vom Sadev völlig aus Edelstahl AISI 304 hergestellt ist. Diese letzte Eigenschaft macht ihm vom technischen und ästhetischen Gesichtspunkt sehr interessant, das Verhältnis Qualität-Preis ist auch sehr gut. Das Schiebesystem aus Edelstahl ist für eine sehr breite Reihe von architektonischen Kontexten: modernen, minimalen und in Umstrukturierungen historischer Gebäude geeignet. Es kann an der Wand oder direkt am Glas fixiert sein und es ist mit Einzelante oder Doppelante vorgesehen. Die Einfachheit der Installation und der Einstellung (man verkauft ihm in einfachen und kompletten Kits) machen ihm vom vielen Installateuren in Italien und in der ganzen Welt sehr geliebt.
